those children who had been breastfed scored nearly seven points higher on an IQ test — but only if they
had a particular version of the FADS2 gene
in the short run, researchers are trying to devise aids that would overcome a person's inherent limitations, such
as mental fatigue
overnight, even frozen food addiction hypothesis to nearly half of the engineered blood pressure-reduction
of feminism and the sexual revolution had made their way even to rural Ontario, where they crashed hard
the towns are set to become two of the first cities in the country to receive the breastfeeding-family-friendly
city designation
a system that takes these people and puts them into a jail system that labels them as defective does nothing to
help the problem that these people have or the society that they live in
